

MARINA ROSAL

Natural sandstone

Description, finishing and uses

Technical description

Calcarene natural stone of dull white color, and of uniform porosity; with a slight resemblance to travertines, due its porosity and hardness.

Aesthetic qualities

It has a clear and clean looking, and preserves a rustic and coral style that adapts very well to the aesthetics of Mediterranean constructions.

Applications

Its applications include facades and pavements, especially outdoors. With very insulating properties, it does not provide a burn feeling when it is touch and balances very well the level of adherence with dry or wet floors. It does not produce puddles and easily evaporates the water.

Formats

Standart: 60 x 40 / 60 x 30 cm

Trend: 120 x 40 / 60 x 60 cm

Large formats: 80 x 80 / 90 x 90 / 120 x 80 cm

Thicknesses: Starting from 2 cm we can produce any thicknes.

Treatments

Water-repellent, oil-repellent and others.

It is advisable to treat the natural stone once installed with special products that do not alter its appearance.

Features and values

Bulk density: 2.280 Kg/m3

Porosity: 15,4%

Water absorption: 6,7 %

Resistance to freezing: NDP

Slipping resistance: 67-51 Dry-damp

Reaction to fire: A1 Class

Bending strength: 7,30 MPa

Compressive strength: NDP

Abrasion resistance: 24 mm

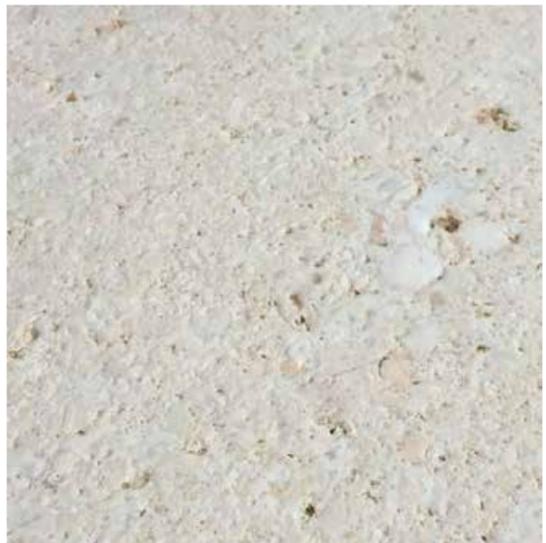

NATURAL

Most appropriate uses:

Traditional or ventilated facade.

Outdoor pavements and pool edges.

Decorative elements such as balustrades, moldings, columns, facilities, etc.

BRUSHED

Most appropriate uses:

Outdoor or indoor pavements communicating outdoors.

Pool edges with a softer effect to the touch.
