

Altamira Rosal

The idyllic spirit of the Mediterranean country houses.

FEATURES AND VALUES

- Bulk density**
2.630 Kg/m3
- Porosity**
2.19%
- Water absorption**
0.83%
- Resistance to freezing**
168 Cycles without breakage
- Slipping resistance**
Class 2 (CTE)
- Reaction to fire**
A1 Class
- Bending strength**
11.2 MPa middle value,
10.04MPa lower expected value
- Compressive strength**
154.3 MPa middle value,
145.8 MPa lower expected value
- Abrasion resistance**
18,8 mm middle value,
17,9 maximum expected value

TECHNICAL DESCRIPTION

Natural stone. Aged natural limestone evoking the course of time with its patina effect, it shows a low porosity and high compression, as well as high hardness.

AESTHETIC QUALITIES

In this natural stone, the handcrafted finishing and the soft mixing of white and salmon tones, provides a pleasantly uneven surface that reminds to the French Provence.

APPLICATIONS

Its properties ensure a durable performance and an easy maintenance, which makes it perfect for the public works sector and pavements intended for public use, it is also aesthetically suitable for the residential use, as well as for commercial and restoration projects, either in outdoor or indoor environments.

TREATMENS

We advise to treat the natural stone, the first layer in the production line and the second once installed.

FORMATS

- Standard** Free length of 30 and 40 cm
- Trend** Roman opus with broken edges.
- Thicknesses** Starting from 2 cm we can produce any thickness.

FINISHING

VINTAGE

MOST APPROPRIATE USES

- Outdoor or indoor pavements showing a worn out effect.
