

Antiq Rosal

Evokes the charm of the Andalusian farmhouses.

FEATURES AND VALUES

- Bulk density**
1880 kg/m3
- Porosity**
30.4%
- Water absorption**
14.53 %
- Resistance to freezing**
168 Cicles
- Slipping resistance**
90 dry 86 damp 3 class (CTE)
- Reaction to fire**
3 Class
- Bending strength**
3,5 MPa
- Compressive strength**
N 17
- Abrasion resistance**
29 mm
- Breaking load for anchors**
600Nt

TECHNICAL DESCRIPTION

It is a calcarenite natural stone, showing cream tones. With a much textured surface showing the presence of marine fossils. In pavements that were intended to walk barefoot is where it provides the best features, it does not heat up, it does not make puddles and its touch is soft and very pleasant.

AESTHETIC QUALITIES

It transmits the excellence of the rustic style. Its combination of color and texture suggest an aged finishing that, according to the contemporary trends, and particularly when used in open rooms where the exterior connects with the interior, it achieves to evoke the appearance of Mediterranean country houses, as well as the resemblance of the farmhouses of yesteryear.

APPLICATIONS

It is suitable for pools finishing, stairs and outdoors or indoors pavements.

TREATMENS

We advise to treat the natural stone, the first layer in the production line and the second once installed.
