

Bruna Rosal

Great hardness. Elegant but natural texture in a graphite black color.

TECHNICAL DESCRIPTION

Natural limestone of graphite black color, with a subtly textured surface. It shows a slightly laminated structure that is similar to the slate but much more compact.

AESTHETIC QUALITIES

This natural stone provides personality to any project, evoking sophistication and majesty to the environments. It is the best choice for the avant-garde styles.

FEATURES AND VALUES

Bulk density

2.680 Kg/m³

Porosity

0,4 %

Water absorption

0,1 %

Resistance to freezing

168 Cycles without breakage

Slipping resistance

91-68 Dry-damp 3 class (CTE)

Reaction to fire

A1 Class

Bending strength

29 MPa

Compressive strength

278 MPa

Abrasion resistance

22,5 mm

Breaking load for anchors

2250 N

APPLICATIONS

Mainly used outdoors due its resistance and low maintenance, it can be used also either in facades or in pavements. It represents an alternative to the slate of black color due its hardness. It is advisable to combine it with stones showing a lighter and warmer color, such as Alba Rosal or Albamiel, due they are giving a bit of light to the resulting combination.

TREATMENTS

We advise to treat the natural stone, the first layer in the production line and the second once installed.

FORMATS

Estándar 60 x 40 cm.

Trend 20 x 40 / 60 x 60 cm.

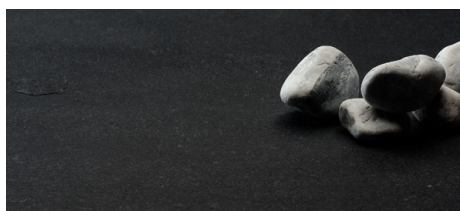

Large formats

80 x 80 / 90 x 90 / 100 x 60 cm.

Thicknesses Starting from 2 cm we can produce any thickness.

FINISHING

NATURAL

MOST APPROPRIATE USES

· Outdoors, mainly for facades.
