

Capri Rosal

White Limestone

FEATURES AND VALUES

- Bulk density**
2.480 Kg/m³
- Porosity**
6%
- Water absorption**
2,39%
- Slipping resistance**
SRV en húmedo: 64
- Reaction to fire**
Classe A1
- Bending strength**
10,5 MPa
- Compressive strength**
79,6 MPa
- Abrasion resistance**
24.5 mm

TECHNICAL DESCRIPTION

Dull white limestone of high hardness and easy maintenance. It is a classic among the stones, used in construction for many years, mainly in facades where it provides very good technical performance.

AESTHETIC DESCRIPTION

Brings light and modernity to the spaces.

APPLICATIONS

Limestone Capri is a very versatile stone that offers a wide range of possibilities in interior and exterior cladding, as well as in paving and pool copings. It is mainly used in traditional and ventilated facades, as well as dull interior paving.

Available in smooth but always matte finishes for interior and facade cladding or paving, or with fine wear for exterior paving and pool coping, making it non-slip and pleasant to the touch for bare feet.

TREATMENS

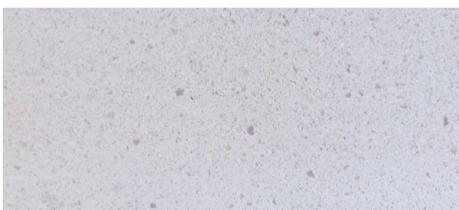

Nous conseillons de traiter la pierre naturelle, la première couche dans la ligne de production et la seconde couche une fois installée.

FORMATS

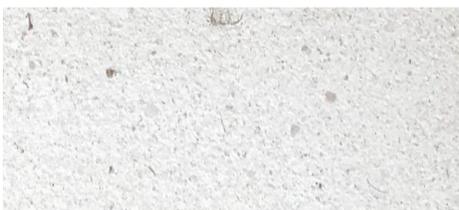

- Standard** 60 x 40cm / 60 x 30cm
- Trend** 120 x 40cm / 60 x 60cm
- Large formats** 80 x 80 cm / 90 x 90 cm / 120 x 80 cm
- Thicknesses** Starting from 2 cm we can produce any thickness.

FINISHING

HONED

BRUSHED

VINTAGE

MOST APPROPRIATE USES

- Traditional Facades or ventilated ones.
- Soft and satin pavements, slightly shiny, mainly to be used indoor.
- Decorative elements such as balustrades, moldings, columns, facilities, etc.
- Beaches and edges/upper part of the pools due its softness to the touch, while it is keeping its non-slipping properties.
- Garden and urban furniture.
- To simulate a slightly worn out effect on facades due the passage of time.
- Pavements of areas that require a very high non-slipping capacity.
