

POLICY AND GENERAL OBJECTIVES FOR THE YEAR 2016

Edition. : 6

At Areniscas Rosal S.A., we are a second-generation family business, devoted since 1985 to the Extraction, Elaboration, Design and the Marketing of the Natural Stones, we count with the ISO 9001 and ISO14001 certifications since 2005, and with our family protocol, signed in 2007.

Our main strengths

1. – The extraction activities, which are carried out in our own quarries using a unique method, which is environmentally respectful and safe, without significant risks for our workers.
2. – The possession of a portfolio of products offering a different aesthetic and technical line.
3. – The elaboration of special construction elements.

We highlight the genuine value of the sedimentary rocks, created millions of years ago at the bottom of the sea, thanks to their versatility and qualities as a natural insulator, these rocks represent a basic element in the construction of notable buildings created by several civilizations, along of the Mediterranean for thousands of years until the present time. Ours is a current history, created through our products and designs, to make possible the essence of the Mediterranean be reflected in the homes of our customers. The balance between tradition and modernity creates a historical legacy for a sustainable future. We transmit the Mediterranean tradition to the rest of the world.

Our main objective

To achieve the maximum development possible as a company in the field of the natural stone.

To achieve this goal, we have a direct commitment to:

1. – Identify the risks and opportunities allowing the rationalisation of our decision-making process, defining that way the actions to be taken and the principles that will inspire our guidelines to such regard.
2. – Apply a sustainable use of the resources for the protection of our ecosystem and its biodiversity, helping this way to reduce the climate change by expanding our control and influence regarding the environmental impact of our products throughout their life cycle, preventing any kind of contamination.
3. – Define the objectives related to the performance of our improvement, determining the necessary criteria for its evaluation toward the continuous improvement of processes through the planning activities, execution, evaluation and ulterior correction.

All this with our maximum respect to the current legislation and toward the social responsibility.

Sgd. The managing director of Areniscas Rosal S.A.
